

FENWICKS MARINA

BROOKLYN N.S.W.

GETTING TO FENWICKS MARINA VIA BOAT

Once you pass Dangar Island, continue under the Hawkesbury River Railway Bridge. Then give us a ring to let us know you have just gone under the bridge. We will advise to come straight in or hold off in the main channel.

You'll then see the Hawkesbury River Freeway Bridge ahead please **do not** go under this bridge. Instead, turn left into Sandbrook Inlet just before it.

Follow the inlet straight ahead and you'll find us as the third marina along. Look out for a two-storey brick building with solar panels and our green travel lift nearby.

Please see next page

FENWICKS MARINA

BROOKLYN N.S.W.

Please remove any fenders or ropes hanging over the sides before entering the lift. Head in toward the T-head, then continue down to the travel lift ramps. As you approach, keep closer to the berthed boats rather than coming in too wide. (see photo above)

Continue at a slow speed and follow all instructions from our staff. If your vessel has bow thrusters, please use them with care as they can fling the lifting slings. When lining up, aim your bow toward the “S” in Fenwicks Marina, located centrally at the top of the green straddle carrier.

When exiting the Lift please follow this same path turning around in front of the marina.
